Paver Rebate Program

The first fifty District residents each calendar year that convert their residential driveway from an impervious surface to a pervious paver-type surface shall be entitled to a two hundred and fifty dollar ($250) incentive payment from the District upon confirmation by the District manager that the conversion has been completed and meets the eligibility criteria of this program.

Program Requirements:

The rebate will be granted for new projects when pervious pavers are installed by a 3rd party contractor. This rebate applies to pervious pavers only not permeable or porous.

The driveway conversion from impervious surface to pervious paver type surface must be completed within the calendar year being claimed.

The resident must provide the District with the manufacturer's documentation certifying the replacement pavers as pervious.

The resident must provide the job permit number issued by the City of Coral Springs.

The resident must provide receipt or invoice from hired contractor showing service address.

Resident must submit the attached application to the District for payment. Before and after pictures must be included.

The payment eligibility will be determined by the closeout date of the city permit for incentive award to the first 50 applicants.

Once we receive all necessary documentation, a rebate check in the amount of $250 will be submitted for payment. CSID is sponsoring this (one-time only) rebate. Only one rebate is allowed per property.
